EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification, Page 1, line 10, after "2003," insert -- now abandoned.--

In the Specification, Page 1, line 11, after "2002", insert --, now abandoned--

2. The following is an examiner's statement of reasons for allowance:

3. The amendment filed on March 9, 2009, has been entered. Claims 1, 2, 5 - 11, 17 - 20, and 26 have been cancelled. Claims 3, 4, 12 - 16, and 21 - 25 have been amended. Therefore, claims 3, 4, 12 - 16, and 21 - 25 are pending.

4. The cancellation of claims 11 and 26 renders moot the rejections and objections to those claims set forth in the previous Office Action.

5. The rejections to claims 3, 4, 12 - 16, 21, 22, 24, and 25 are withdrawn since Cree et al. (5,792,404) fails to teach that the deformations formed from fibers integral with the base and fibers broken from and not integral with the base are aligned to create a tunnel shape, which is defined as a raised region wherein the fibers are aligned to create an open void area with two openings on the ends, and the center of the tuft is open to create a pathway between the open ends. Cree et al. teaches that the raised region as a continuous wall.

6. The prior art fails to teach or fairly suggest a tufted fibrous web comprising substantially randomly-oriented fibers, comprising a first region and a plurality of discrete second regions, each of the second regions having at least a discontinuity portion and a deformation portion, wherein the deformation portion comprises fibers integral with but extending from the first regions and fibers broken from and not extending from the first regions and the deformation comprises looped, aligned fibers forming tunnel shaped deformations. For purposes of examining, the term "tunnel shaped" is examined based on the description in the disclosure (Figure 3, page 9, lines 15 - 25. and page 12, lines 8 - 22), as a raised region that includes

Art Unit: 1794

fibers that are aligned to create open void areas, with two openings on the ends, and the center of the tuft is open to create a pathway between the open ends, as opposed to a raised region with continuous walls.

Therefore, claims 3, 4, 12 - 16, and 21 - 25 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
